

PROFILE

Tavolaro Pablo

BACKEND DEVELOPER

Professional in the area of electronic engineering with more than 15 years researching and developing electronics, Sdk, Api, applications and firmware for the national and international market . I am currently working as a backend java developer.

EDUCATION

Electronic Engineering

Mercantile Marine University Dic 2022

LANGUAGES English: A1+ Spanish: Native

SKILL

SpringBoot Spring Data Spring security

SQL server MySQL LiquidBase

React Angular Js Ts Mui Bootstrap

Eclipse IntelliJ Netbeans Java

Embedded electronics C C++ Python

Lombok Swagger Git Gitlab TestNg Junit

Mockito Allure PrimeFaces Jenkins

C 32/16/8 bits Os Rtos DataBase Custom

Sdk Linux Windows App Android Python windows Microservice Docker Compose

Stack Tcp Ip usb FileSystem

Reverse Engineering

PROFESSIONAL EXPERIENCE

SemiSenior BackEnd Java

CDT Soluciones tecnológicas ,caba

Oct 2022 – Present

Email delivery services. Google cloud Platform. Analysis of the code and architecture used in gcp. Improvement and continuous evolution of the system. Unit and integration tests.

SemiSenior Java Full Stack

MbSoft s.a., caba

Oct 2021 – Sep 2022

Functional analysis of the required tasks. Analysis of the impact of the change at the code level of the tasks. Carry out the implementation in java and primefaces of the tasks. Study of the business model and implementation of database queries. Document the required architectures.

Senior R&D Hardware and Firmware

Intelektron, caba

Nov 2005 -Sep 2021

Research and development of hardware/firmware in C C++ on 32/16/8 bit architectures, app in java/python
